# FAIRVIEW ONE

## FAIRVIEW HAS BEEN SUPPLYING JOINERY TO THE NEW ZEALAND MARKET FOR OVER 50 YEARS

Fairview One, our latest aluminium window and door system, is fully tested to extra high wind zones and suitable for all residential builds, even including architectural projects with windows and doors up to 2.5m high.

Fairview One is the result of extensive research coupled with the pursuit of design excellence. What sets it apart is the smart design of a proprietary corner joint, which allows joinery to be made with strength and durability in mind.

### BENEFITS

- **Maximise your views** with narrow frame bi-fold doors and windows.
- **Smoother sliding doors** due to improved track system.
- **Easier to clean and maintain** due to the curved condensation system.
- **Reduced risk of damage in build / installation process** as the corner joint stays intact, meaning joinery can be handled a number of times.

### PRODUCT RANGE

- Fixed windows
- Awning & casement windows
- Bi-fold windows and doors
- Sliding and stacking windows
- Sliding and stacking doors
- Hinged doors
